Program runs June 2022

Cross-Functional Training for Managers and Supervisors

Developing Multi-Faceted and Agile Leaders to Drive Breakthrough Growth for the Company

OVERVIEW

Companies today operate in highly complex, competitive, and volatile industries and require multi-functional collaboration between key teams like Finance, Human Resources, Marketing, and Operations. In contrast to a traditional team management setting with a silo working culture, a cross-functional team is where groups with different functional expertise collaboratively work together toward a common goal.

Cross-functional teams require well-organized, collaborative, and agile leadership. The key to driving business growth, retaining high-potential employees, and honing a competitive advantage for the company is to develop the cross-functional knowledge, skills, and competencies of functional leaders, supervisors, and managers.

By joining the program, leaders will expand their capabilities and develop a wide array of knowledge of their organization's business model and functional linkages. They will make strategic actions and operational decisions equipped with a holistic perspective, linking operations plans to customer experience, financial results, and human capital management.

With effective cross-functional leaders, the company will reach new heights, achieve breakthrough business strategies and growth, and address an array of organizational challenges in a collaborative manner with a team-winning spirit.
