Results-Based Monitoring and Evaluation

Enhancing the Effectiveness of Development Programs and Projects

Program runs in February 2023
Results-Based Monitoring and Evaluation
Enhancing the Effectiveness of Development Programs and Projects

OVERVIEW

Results-Based Monitoring and Evaluation (RBM&E) is a systematic approach for monitoring performance and evaluating the long-term results of projects instead of just short-term output. It enhances the effectiveness of development programs and projects implemented by organizations from both private and public sectors.

This ten half-day program is designed for current and potential leaders working on development programs and projects and covers topics on M&E concepts and principles, current practices on M&E, program/project logframe, developing performance indicators, use of applicable tools and techniques, use of information systems, and using M&E results.

By joining the program, you will hone your RBM&E competencies, and you will learn how to prepare M&E plans and implement M&E systems using contemporary tools and techniques. It will sharpen your understanding of the results chain using logic models, as well as skills in developing indicators and targets and designing methods for data collection and analysis.

PROGRAM OBJECTIVES

At the end of the program, each participant would have acquired the skills and techniques required for:

1. Monitoring programs/projects, with particular focus on setting up effective Monitoring systems
2. Conducting project completion activities, underscoring generation of substantive reports
3. Designing program/project evaluations, applying proper evaluation criteria, and using appropriate methodologies
4. Differentiating quantitative and qualitative methods for evaluation
5. Formulating effective Monitoring and Evaluation (M&E) Plan
