Processing

Program starts in May 2023

Postgraduate Certificate in Data Privacy, Protection, and Operational Excellence:

Policy and Third-Party Management

Understanding Third-Party Personal Information Processing

OVERVIEW

Third-party management is the process whereby companies monitor and manage interactions with all external parties with which they have a relationship. This may include both contractual and non-contractual parties. How should organizations engage third parties to ensure the protection of personal data? What is the right way of managing your solution providers, vendors, suppliers, and personal information processors? To what extent should you manage them, and how do you conduct proper due diligence to not expose your organization to more risks?

Managing third-party personal information processing providers has been a challenge for compliance, audit, and risk management. For data protection and data governance professionals, it is a must to ensure that vendors and personal information processors (PIPs) support the privacy and data protection compliance requirements of both the organization and government regulators.

You can delegate the task, but not the accountability – when your third-party providers suffer a personal data breach, it impacts your organization and your customers.

This course will teach you the frameworks, techniques, and best practices for managing your third-party providers, in the aspect of information security and privacy. Learn how to choose the right vendors and personal information processors, how to conduct due diligence, how to craft policies and contracts which protect your organization, and how to monitor whether your third parties are complying with your terms and requirements.

PROGRAM OBJECTIVES

The course aims to provide compliance and data protection professionals with the right knowledge and techniques when it comes to managing third-party vendors. Participants will go back to their organization with toolkits that will enable them to better scrutinize, choose, and manage their third-party providers and personal information processors.

By joining the program, participants will gain the right mindset and confidence to enforce the right practices in third-party management, so that they can help minimize the risk exposure of the business.

Postgraduate Certificate in Data Protection, Privacy and Operational Excellence Courses:

Data Protection Officer Course (DPO ACE)
Privacy Impact Assessment Course (PIA)
Policy and Third-Party Management Course
Information Security and Privacy Course
Data Breach Response Management Course

KEY BENEFITS

Well-structured Program and World-class Faculty

The online program offers a venue for high-impact learning with real-time, experiential, and interactive online sessions.

The participants will learn from AIM's world-class faculty, industry leaders, and practitioners network.

Gain a Holistic Business Perspective and Deeper Understanding of Privacy and Data Protection

The program helps leaders, managers, supervisors, and individual contributors develop a broader business perspective and a deeper understanding of privacy and data protection linkages between key teams in an organization, such as Finance, Sales, Marketing, Customer Service, Human Resources, and Operations.

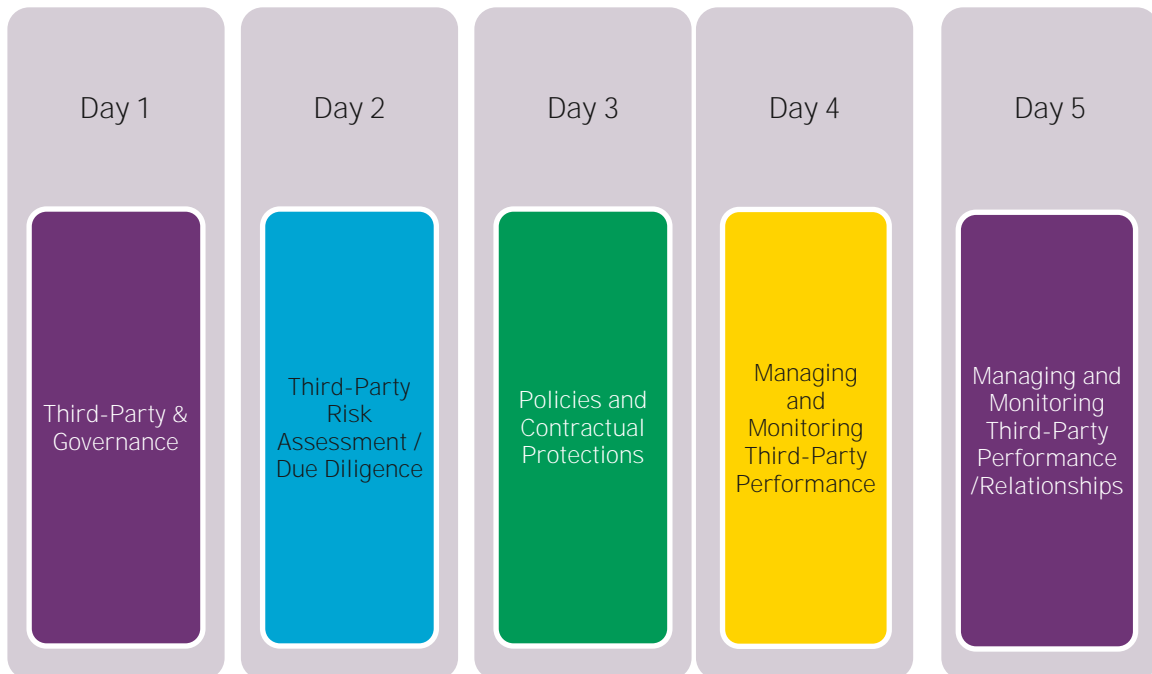

Enhanced Privacy and Data Protection Leadership and Personal Data Governance Skills

The program enhances the participants' capability to lead and manage in a cross-functional setting, improving performance, planning, collaboration, and execution of cross-functional efforts while embedding privacy and data protection in business processes.

WHO SHOULD ATTEND

- Data Protection Officers, Data Protection Professionals, Data Governance Officers, and Information Security Officers who want to enhance their third-party management capabilities.
- Compliance Officers, Risk Management Officers, and Audit Management Professionals will also understand how to manage better and audit their third-party suppliers and vendors.
- This program will also benefit entrepreneurs and Business Owners who want to learn how to govern their vendors and suppliers better to reduce risk.
